Consumer Buying Behavior at Shopping Malls: Does Gender Matter?

Ankit Katrodia, Micheline Juliana Naude, Sanjay Soni

Shopping mall Attractiveness Advertising 2018

[Full Text at Publisher](#) [Access via your Institution](#) [Cite this on Citationsy](#) [Open in Google Scholar](#) [Visualize on Litmaps](#) [Listen to this paper on R Discovery](#)

The development of shopping malls is a major social and global phenomenon that has unearthed a novel facet for customer satisfaction and their consequent or relative buying behavior. The aim of his paper was to explore the gender differences in consumer buying behavior at selected Durban shopping malls. It is an observational cross-sectional study carried out on 700 randomly selected respondents to study buying capacity, buying behavior and shopping experience of male and female consumers at shopping malls in the city of Durban, South Africa. Data was collected through pre-tested semi-structured questionnaire with closed ended questions. The study revealed that there are notable gender differences, which shape shopping behavior among men and women. Time and money spent at the mall was significantly high among female as compared to male consumers. Consequently, the results attributed that personal attributes and shopping mall attractiveness factors played a crucial role in influencing customer shopping behavior amongst the mall shoppers. The study concludes that gender differences are prevalent in the buying behavior of customers at the select shopping malls in Durban, South Africa. Average time spent by female is high as compared to male which also affect their average money spent at shopping mall. Psychological, Social and Cultural factors are highly influencing customersâ€™ buying behavior at shopping malls.

Reports to the Military Office of the President of the Republic in Czechoslovakia on the situation in Poland in 1935
The article focuses on the military and political reports of the Military Office of the President of the Czechoslovak Republic in 1935. The relations between Czechoslovakia and Poland in the interwar period were not ideal for a number of reasons, yet there were mutual contacts, one of which was the work of the diplomatic corps and military attachés. The view of these reports on developments in Poland was an important source of information for the Czechoslovak President. That is why the reports are quite detailed. The article presents them with a commentary on the events mentioned and with the
