Vyhledávací možnosti

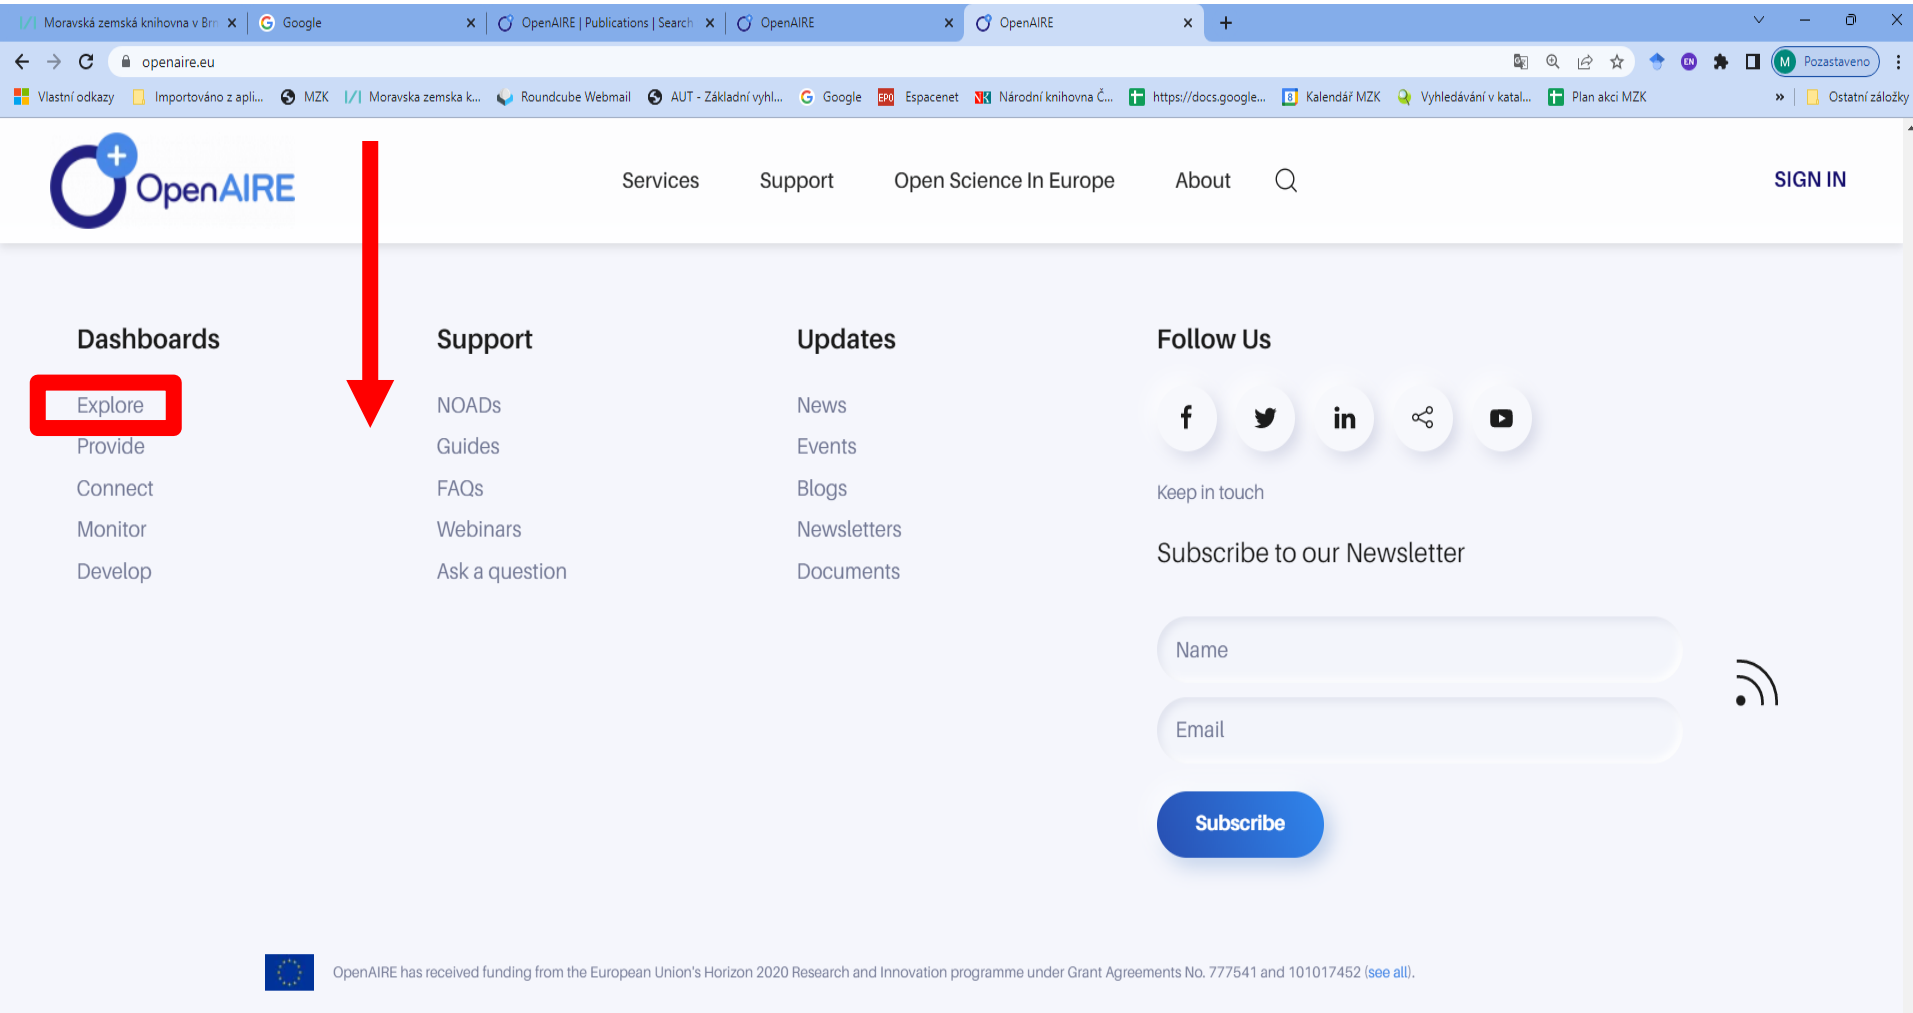

- Není k dispozici help pro vyhledávání.

Ze zkušeností vyplývá:

- K zadání složitého dotazu za využití booleovských operátorů je vhodné používat pokročilé vyhledávací rozhraní, nikoliv základní rešeršní masku.
- Systém sám hledá další tvary slov, stačí napsat kořen slov.
- Je možné používat oboustranné horní uvozovky pro fráze (pevná slovní spojení).
