Student thesis

Abstract [en]

Fashion advertising has long been repudiated for fostering narrow and stereotypical imagery of women. Today consumers demand advertisements to be inclusive and real in their portrayals. As a result, there is an increasingly visible marketing phenomenon, called Femvertising, which merges the feministic ideology of empowerment and liberty with brand image and sales. The purpose of the study is to explore consumers' opinions about femvertising by fashion brands. Within this, the thesis seeks to explore how consumers feel about these advertisements and the outcome they perceive these to have. Through snowballed sampling focused on reaching diverse people connected via social media, a wide array of thoughts and perspectives on femvertising is sought to fulfill the purpose.
